**CSC690 Final Movies App**

**Description**
Movies is an app for simple people who want to know the movies that are playing right now. The app also shows a list of upcoming movies using a movie database API. With one click away, a user will able to view these movies without any fancy animations or login requirements.

**Must-have Features**
- A view of movies that are currently playing in the theaters now
- A view of movies that are coming to the theaters soon
- A view of movie details when a movie is clicked on

**Nice-to-have Features**
- A link to the trailer of the movie in the movie details page
- A link to purchase tickets in the movie details page

**Conclusion**
Movies is an app for very simple people who want to know the movies that are playing in the theaters now and want to know some movies that are coming out soon. It only takes a few clicks to use the app without any complicated and fancy features.
